

HOME INSPECTORS

A professional inspector prior to purchase should inspect all homes, new and resale. Normally, this is done as soon after contract is accepted as possible. This time frame is spelled out in the contract.

The following home inspectors do a very thorough and responsible job. They inspect and document current problems and future upkeep needed on a home.

The cost of an inspection must be paid by the Purchaser and ranges from \$250-\$400 on most homes. When considering an inspector always ask for professional affiliations, price, type of report and time frame to receive report.
